Course Objectives

This is a graduate-level course that requires substantial reading and analysis of both the course text and the decisions of state and federal courts. The course has the following general learning goals:

2. Provide the tools to equip the student to analyze a situation and identify potential legal issues

3. Describe the evolving legal theories that define the student–institution relationship and how they affect professional practice
4. Maintain an appropriate degree of confidentiality that follows applicable legal and licensing requirements, facilitates the development of trusting relationships, and recognizes when confidentiality should be broken to protect the student or others.
5. Describe how national constitutions and laws influence the rights that students, faculty, and staff have on public and private college campuses.
6. Explain the concepts of risk management and liability reduction strategies.
7. Explain when to consult with one's immediate supervisor and campus legal counsel about those matters that may have legal ramifications.

11. Identify the internal and external special interest groups that influence policy makers at the department, institutional, local, state/province, and federal levels
12. Describe the public debates surrounding the major policy issues in higher education, including access, affordability, accountability, and quality.
13. Describe the governance systems at one's institution, including the governance structures for faculty, staff, and students.
14. Describe the system used to govern or coordinate one's state/province system of higher education, including community college, for-profit, and private higher education.
15. Describe the federal and state/province role in higher education
16. Explain the advantages and disadvantages of different types of decision making processes (e.g., consensus, majority vote, and decision by authority).
17. Identify and then effectively consult with key stakeholders and those with diverse perspectives to make informed decisions.
