

Motivation in the Classroom

15:295:518:90, Spring 2012

On-line Course, with one on-campus meetings 1/19 4:50 - 7:30 in the GSE lecture hall ¹

Professor Toni Kempler Rogat

Office: GSE, Room 317

Phone: (732) 932-7496 ext. 8318 (office)

E-mail: toni.kempler.rogat@gse.rutgers.edu

Office hours: Wednesdays 2:00-4:00 pm, and by appointment (via skype, phone, or in person)

Required Readings

1. Schunk, D. H., Pintrich, P. R., & Meece, J. L. (2008). *Motivation in Education: Theory, research, and applications* (3rd ed.). Upper Saddle River, NJ: Merrill Prentice Hall.
(Note: Text is available at New Jersey Books on 37 Easton Avenue in New Brunswick).
2. Course readings: On-line articles and book chapters that will be posted on Sakai

Course Description

This course provides an in-depth look at the development of achievement motivation in educational settings (elementary through college) from a psychological perspective. Most theories and research on achievement motivation are framed around two major components of students' motivation: Can I do this task? Why do I want to do this task? We will address these questions through the theoretical lenses of major theories of achievement motivation including expectancy-value theory, attribution theory, achievement goal theory, self-determination theory, and theories of personal and situational interest. We will examine how and why students' responses to these questions shape their engagement and learning.

As part of our discussion, we will consider how achievement motivation develops and what can be done to promote adaptive forms of motivation. In particular, the role of parents (e.g., parental expectations), peers, and teachers (e.g., structure of the classroom in terms of tasks, autonomy, and recognition/evaluation) will be considered in relation to the fostering of adaptive forms of achievement motivation. Finally, we will discuss the influence of student characteristics such as age, gender, ethnicity, and culture and how they might contribute to individual variation in motivation.

Course Organization

This course will be conducted primarily as a discussion seminar. We will engage in weekly discussions related to the assigned motivational theory and accompanying readings. All seminar participants will be a member of a small group within which you will raise questions and discuss the topic of the week. In addition, everyone will have the opportunity to be involved in leading the on-line discussion by facilitating group discussions. You will be expected to make each session stimulating by keeping up with the readings, organizing your thoughts before each session, and participating actively in class discussions. Keep in mind that I cannot simply teach you what you need to know about the "psychology of motivation". In order for you to effectively learn, you must be willing to be an active and engaged participant in the learning process. Thus, how much you learn in this course will be directly proportional to your level of commitment and involvement.

¹This is our only on-campus meeting scheduled for the semester. Please try to be there. However, if you are unable to attend this first class session please email me at least one week in advance.

Requirements and Grading

Participation & Weekly Questions/Posts	25%	2 Reflection Papers	40%
Facilitating Discussion	10%	Final Paper	25%

General Approach to the Readings

Approach readings in an active, systematic, and deliberate way (skipping occasional paragraphs is often acceptable). *Read to understand, not just memorize.* After you complete a reading, you should be able to summarize the main thesis of the article and evaluate the research evidence presented by the authors in support of that thesis (or the coherence of a theoretical framework/perspective).

For purposes of summarization, ask yourself the following:

Literature Review

- What is the issue of most concern to the author?
- Why does the author think this issue is important?
- How is the current review or study grounded or established in past research on the issue?
- What are the conceptual/theoretical underpinnings or framework of the author's work? That is, what theoretical assumptions guide the questions and the interpretation and integration of findings?
- What is the gap in the current knowledge that this paper aims to address? What goals do they hope to address?

Empirical Results/ Review

- What are the main findings of the study, or in the case of a nonempirical paper, what are the main points made by the author and what is the most critical evidence presented in support of these points?
- In the case of an empirical paper:
 - What are the dependent and independent variables?
 - Who are the participants? How were the participants involved?
 - Are the measures reliable and valid?
 - Are the conclusions valid for *this sample*? (Internal validity)
 - Are the conclusions generalizable to other participants? To other settings? To other tasks? To other measures? (External validity)

For purposes of evaluation, ask yourself the following:

- What are the strengths and weakness of the author's work (e.g. its theoretical or empirical contribution, credibility of assumptions, appropriateness of research design, measures, sample selection, interpretation, applications)?
- Does the author address the gap and cited goals?
- How would you improve on this work?
- What questions provoked by the author merits further study?
- What research designs or methods would be fruitful in addressing these questions in future investigation?

Active Class Participation and Weekly Questions

25% of final grade

This is a discussion-oriented seminar and everyone is expected to participate in our on-line discussion in the following ways:

- *Weekly Questions and Posts:* Each week you will be responsible for responding to the guiding questions that I post early in the week and for later responding to the questions posed by your group's weekly facilitator (see below). By responding to these questions and the posts of your group members, a discussion thread will be created specific to the week's topics. Beyond replying these posed questions, you should also be posting your own questions and/or reflection comments that are relevant to the week's motivational theory and assigned readings. My role will be to provide feedback on your posts and at times prompt further discussion. I will review all posts weekly.
- *Weekly Reflections:* Each week you must submit a one-page personal reflection on your blog. Your personal reflection can discuss one (or more) of the following topics: Elaborate a point or discussion thread from your group discussion, connect among theories, summarize the main points of your group's discussion, apply ideas to classroom settings (or other contexts relevant for you), extend and propose a new thoughtful reflection, etc.

Taking on Leadership Roles in the Group (10% of final grade)

- *Facilitator:* All seminar participants will be assigned to the role of facilitating 2-3 of your weekly small group discussions. When you facilitate a small group discussion you will be responsible for two main activities. First, you will post questions to facilitate your group's weekly posts based on your reactions to the assigned readings. Second, you will be responsible for helping to focus and sustain the momentum of your group's discussion. This may include posing additional questions, asking follow-up prompts to a post, asking peers to explain, elaborate, or justify their idea, or by suggesting a connection among posts (within or across weeks). This will also include guiding the discussion back toward central issues.

Thought-provoking questions and posts go beyond definitional issues or areas of confusion (these are also appropriate for discussion), but instead really grapple with some of the key issues, current debates, and themes of the field of motivational research. In addition, posts attempt to make connections among the week's readings and will try to tie the current week's topic with those covered in other weeks. It would also be acceptable to post stating an argument or point that you derive from the articles and asking if others agree. Example questions might include:

- Questions might grapple with unpacking and understanding the constructs, ideas, and assumptions presented by a specific theory. For example, is the distinction between identified and integrated regulation meaningful?
- You should feel comfortable introducing key issue or themes from the week's readings. That is, after having read the set of articles and/or chapters for the week, reflect back on the issues raised across the varying viewpoints presented in the readings. Be prepared to introduce, explain, and provide examples of a central theme or issue that was raised to your attention. This will contribute to our joint summary of the readings and help to advance the discussion of the key issues regarding these motivational theories.
- Does this theoretical construct/idea apply to younger children and adolescents?
- How is this construct relevant to schools/classrooms?

Reflection Papers

40% of final grade

The purpose of these papers is to give you an opportunity to engage in a theoretical analysis/synthesis of the readings. You will pick 2 of the 4 assigned reflection papers to complete. The reflection papers should be approximately 5 typed pages and focused on the assigned topic. I will distribute some suggested paper topics/questions the week before they are due. (*Note: the week that a reflection paper is due, you do not need to submit your weekly reflection as described in weekly participation*). The general topics for the papers and the dates that the topics will be handed out are listed below (also see course outline of readings):

Note: The week presented here indicate when the paper topic will be handed out.

Reflection Paper Schedule:

1st Reflection Paper	Wk 2	Expectancy-value, Attribution Theory
2 nd Reflection Paper	Wk 4	Competence beliefs
3 rd Reflection Paper	Wk 5	Achievement Goal Theory, Intrinsic Motivation,
4 th Reflection Paper	Wk 10	Engagement, Motivation regulation, Social views

Final Paper & Presentation

25% of final grade

For the final paper, you will be asked to write a scholarly paper that is approximately 12-15 pages (double spaced, Times New Roman 12pt font). The paper will give you the opportunity to explore an aspect of the course in greater detail or extend a topic to another area (e.g. deeper examination of achievement goal theory, consideration of developmental or ethnic differences and motivation). You may also pursue other areas of motivation not specifically addressed in-depth in the course (e.g. motivation of special education students, motivational explanations for problem behaviors (e.g., anxiety disorders), teacher motivation, motivation in technology-enhanced classrooms). I am open to your suggestions.

You must use at least 8 *new* references (outside of the course readings). I also encourage you to use references from the course readings, but these will not “count” as part of minimum references. The references should be from psychological journals or edited books. Please do not use web pages or “popular psychology” books as sources (check with me if you are unsure about the source you wish to use). You may find the following journals particularly useful (although feel free to use other journals as well): *Journal of Educational Psychology*, *Educational Psychologist*, *Child Development*, *Developmental Psychology*, *Journal of Applied Developmental Psychology*, *Contemporary Educational Psychologist*, *American Psychologist*, *Journal of Personality and Social Psychology*, and *The Elementary School Journal*. I also recommend looking at recent edited book chapters. Edited books and handbooks often provide good overviews of a particular topic. When searching for articles, please use a research database such as PsychInfo.

a) **Research Review Paper.** This could be a comprehensive paper summarizing, reviewing and critiquing a specific topic related to the course. This would involve exploring a particular issue in greater depth, and would require accessing additional articles and resources on the selected topic. The paper would introduce the concept under study, central findings of the research, highlight the main issues in the field, present contrasting points of view and debates in the field, and discuss limitations of the current work. In the paper’s conclusion, you could apply relevant issues to a real world context, extend the topic to a new setting, or recommend future directions or avenues for research.

b) **Research Proposal.** A formal proposal for a research project. Consider a research question that comes out of a theoretical perspective or issue related to motivation. Propose a question and a way to examine this issue that might lead to a potential study or a Master’s thesis. The paper would involve a literature review that provides a background of the issue, terms, and relevant work in the area. The paper would go on to introduce a research question that comes out of this work as an extension or application of the area.

You might also introduce the context in which you plan to conduct the study, the participants, and other ideas you have for how you plan to investigate the question under study.

c) Case study. An analysis and/or evaluation of a school program, intervention, curriculum, lesson plan or developed unit (at least two days), group interaction among students, therapy sessions, or piece of software, from a motivational perspective. Alternatively, your final paper could design a program or unit grounded in theories of motivation studied over the course of the semester. The case should apply motivational theories and constructs to your analysis and evaluation of the setting. This paper would first present a description of the context of your case or the developed program. Following or in an integrated manner, the paper would connect the program's features to motivational concepts and theories. The literature you review in preparation for this paper could either examine the theory your intervention is grounded in OR other established interventions that are related to your program. A discussion would follow in which you would discuss the strengths and weakness of the program given these motivational ideas and would make recommendations to further improve the design.

The proposed paper topics must be emailed/handed in by **February 8th**. This initial proposal should focus on providing details about the main issues, points, or controversy you plan to address (a few paragraphs). You should not focus on the value or *why* you selected the topic. In addition, an outline of the final paper that introduces your paper's organization is due in class on **March 29th**. The outline should set the structure for the paper with main headings, the key points you plan to address, and a set of 8-10 *new* references you plan to use. (Note: If you select the case study option, a beginning description of the program is appropriate to help set the context of the final paper, along with the connections to motivation you plan to relate to this case.) These first two stages will allow me to provide initial feedback on your ideas that are taking shape and make suggestions to guide your writing. The final paper will be due **May 10th**.

Papers should be written in a style consistent with the recommendations of the American Psychological Association (6th Edition). Be sure to include a reference list at the end of the paper listing the references cited in your paper. As suggested by the APA manual, please avoid the use of extensive verbatim quotations (limit yourself to at most two verbatim quotations in the entire paper). **However, you should use multiple *citations* throughout the paper to credit your sources and back up your argument.**

Note: It is not acceptable to use a paper that you have used for another course. However, it is acceptable to do a paper on a similar topic (as long as you take a new perspective) and it is acceptable for you to use this paper as an opportunity to develop a paper for another requirement (e.g., conference presentation).

Below are the criteria that will be used to assess your final paper.

Introduction

- Is the purpose of the paper clearly stated?
- Is the justification of the topic clear (why did you pick this topic, why is it important)?
- Is it clear how the paper discussion will be organized?

Body

- Is the evidence/discussion that is presented relevant to the purpose of the paper? (i.e., is the body of the paper written based on the question/purpose stated in the introduction?)
- If there are multiple viewpoints on the topic, are multiple sides presented?
- Are statements justified based on prior research/theory? (citing relevant articles)
- Are relevant theories/ideas from class reading and discussions presented?

- Is information presented logically? Is the paper well organized and easy to follow?
- Does the discussion go beyond a listing of individual papers, by synthesizing the reviewed research?

Conclusion

- Is the relevant evidence integrated and summarized coherently?
- Does the conclusion directly relate to the question(s) asked in the introduction and to the evidence presented in the body?
- Are suggestions made for future directions? If applicable, are suggestions made for practice?

Form/Style

- References and citations in APA style
- Spelling/Grammar
- Clarity (ideas expressed clearly), organization
- Page length/number of references in accordance with assignment guidelines

Outline of Course and Readings²

Please note: I recommend reading the articles in the order listed in the syllabus. In addition, I have left the last week's topic open - so that we can identify a shared topic of interest that meets the needs and interests of the group.

Introduction and Organization

January 19

For the first day of class - please have read....

Schunk, Pintrich & Meece, Chpt 1 (skim)

- Pintrich, P.R. (2003). A motivational science perspective on the role of student motivation in learning and teaching contexts. *Journal of Educational Psychology*, 95, 667-686.

Recommendations for further reading:

- Eccles, J. S., Wigfield, A., & Schiefele, U. (1998). Motivation to succeed. In N. Eisenberg (Ed.), *Handbook of child psychology. Vol. 3. Social, emotional, and personality development* (5th ed., pp. 1017-1095). New York: Wiley.
- Graham, S., & Weiner, B. (1996). Theories and principles of motivation. In D. C. Berliner & R. Calfee (Eds.), *Handbook of educational psychology* (pp. 63-84). New York: Macmillan.
- Weiner, B. (1990). History of motivational research in education. *Journal of Educational Psychology*, 82, 616-622.

Week 1

Expectancy-Value Models

Schunk, Pintrich & Meece, Chapter 2 (skim pp. 45-50, read the remainder of the chapter).

- Wigfield, A., Tonks, S. & Klauda, S.L. (2009). Expectancy-Value Theory. In K. R. Wenzel & A. Wigfield (Eds.), *Handbook of motivation at school*. (pp. 77-104). New York, NY US: Routledge/Taylor & Francis Group.
- Brophy, J. (2008). Developing students' appreciation for what is taught in school. *Educational Psychologist*, 43, 132-141.

Recommendations for further reading:
