Education 306.02 – Educational Psychology
Monday & Thursday 11:30 - 12:50, Campbell Hall A5

Professor Toni Kempler Rogat
Office: GSE, Room 317
Phone: (848) 932-0822 (office)
E-mail: toni.kempler.rogat@gse.rutgers.edu
Office Hours: Monday 1:00-2:00 pm, and by appointment

Course Description
The goal of this course is to introduce a psychological perspective to teaching and learning in classroom contexts through an overview of principles, issues, and related research in educational psychology. Discussions will focus mainly on how psychological principles and theories can help inform teachers about the processes underlying student learning and motivation, and their own instruction. We will examine theories of learning and specific issues regarding complex cognitive processes and motivation. We will apply these theories and constructs in consideration of effective instruction, classroom management, and the assessment of student learning. Accordingly, this class will not focus on specific teaching methods or curriculum issues, as such topics should be covered in your methods courses. Rather this class will hopefully provide you with the “tools” for understanding and making informed decisions concerning aspects of student learning and instruction.

In order for us to productively engage with these topics and educational issues, this course will demand that we apply psychological theories to real world settings and draw connections among theories. Finally, it is critical to recognize that each of the topics under study is not isolated or independent. Rather, topics (e.g. cognition and motivation) are interconnected and important for understanding the “whole” student. For these reasons, we will also work to make connections and integrate topics across the semester.

Learning Objectives

Over the course of the semester, you will be able to meet the following objectives:

- Describe, connect, contrast, and evaluate the primary theories that explain how students learn
- Explain student cognition and learning
- Explain the role of individual differences related to ability and intelligence, socioeconomic status, race, gender and ethnicity for learning
- Characterize the role of motivation for student engagement and learning
- Consider the implications of various instructional and assessment practices for learning, understanding, and motivation
- Apply principles of cognition, learning, individual differences and motivation to the classroom and relevant examples
- Apply principles of learning to yourself as a learner
Course Format
The format of this course will be flexible and will vary from week to week. While I may lecture on specific topics from time to time, class will mostly consist of small group and whole class discussions, collaborative group work, and activities. Given that the emphasis will be on discussion, it is important that you come to class each day prepared to discuss and apply the assigned readings. It is also important to be a contributing member to group discussion, take risks, and share ideas. It is critical to get everyone’s perspectives to fully understand the course material. In addition to assigned readings, there may be occasional thought assignments that will be given in class, to be completed for the following class period.

Course Readings
The main texts of this course will be:

   The text is available at New Jersey Books (located on Eastern Avenue).

2) Assigned articles and book chapters are available via the Sakai course website. 
   **Sakai:** This is our course-specific website. It will be used for class announcements, resources, and assigned class readings. It will also be used for online discussion in collaborative groups. Go to [https://sakai.rutgers.edu/](https://sakai.rutgers.edu/) and sign in using your net id and password. Find the course tab at the top.

Grading
The following assignments are designed to encourage you to think about the course material in a meaningful and reflective manner. Students are encouraged to work together on all requirements for the class. This can include discussion when preparing for the short papers or exams; however students must write and turn in their own individual papers.

Requirements and Grading

90+ A  87 B+  80 B  77 C+  70 C  60 D  <60 F

**Active Class Participation and Attendance**  
10% of final grade

A portion of your grade will be based on participation in class. Therefore, I expect everyone to come to class prepared to actively participate in class discussions, having carefully read and thought about the material beforehand, and in some cases having completed any preparatory assignments. I value most those discussions in which YOU are doing most of the talking. Interacting with each other and with the course material, I believe, is central to this course.

Quality participation is characterized by:
- Sharing your ideas based on thoughtful consideration of your experiences, the readings, and others’ opinions
• Asking thoughtful questions and deeply relating concepts from class and the readings to your experiences as a learner
• Demonstrating your understanding of class readings by using psychological concepts to help explain or justify comments
• Responding to others’ comments in a responsible and constructive manner
• Encouraging your classmates to express their ideas
• Completing all in-class or preparatory written assignments

Unacceptable participation, which can result in a lowered participation grade, is characterized by:
• Class absence
• Physical presence but no cognitive presence (e.g. texting)
• Non-constructive responses to comments made by other students
• No real attempt to complete classroom tasks in a reasonable or thoughtful manner
• No participation in group activities or attempts to distract others

Attendance
Attendance at every class session is required in accordance with the university’s attendance policy. One excused class absence is acceptable. Excused absences include absences due to religious observance, university business, illness, or family emergency. Regardless of the reason behind your absence, you are responsible for any material that we cover. If you are absent for additional classes, this will have an impact on your final grade. Your final grade will be dropped by 2 points for each additional absence. If you are absent additional times we will need to have a conversation about additional assignments that can make up for missed time or whether retaking the course is appropriate.

Short Papers
During the semester, there will be two assigned short papers (5 pages in length). The intent of this class requirement is your demonstrating mastery of topics and issues related to the study of educational psychology. The papers will involve describing your developing psychological perspective on how students learn and are motivated. Here, you will justify your ideas by introducing which theory (or theories) of learning or motivation underlie your approach to teaching and classroom instruction. As part of this discussion, you will make connections between your ideas related to classroom instruction and theories of educational psychology.

The first paper will involve describing your developing psychological perspective on how students learn (Due March 24th). Here, you will justify your ideas by introducing which theory (or theories) of learning underlie your approach to teaching and classroom instruction. The second paper will involve developing your perspective on how students (or yourself) are motivated to learn and how to foster motivation in the classroom given motivational theory (Due April 17th). More details about these two assignments and scoring rubrics will be provided. Papers will be submitted via the assignments tab on Sakai. All papers will be submitted to ‘turnitin’ prior to being graded.

Mid-Term and Final Exam
There will be one in-class exam during the term and a final exam. These assessments will focus on the theories and principles covered in readings, class and online discussion, and group work. Questions require that you apply, contrast, or explain psychology-related concepts. Exams will include multiple choice and short answer. Make-up exams will NOT be scheduled unless there is an explicit conflict with a religious observance or other properly documented excused absence.
Final Notes About Grading and Classroom Policies

Grading
First, grading for all assignments will be criterion referenced. In other words, you will receive a grade based on the quality of your own work and participation in the class, rather than how your work compares to that of your classmates. I believe that you are all capable of attaining an “A” in this class. This does not mean that you will be rewarded for sub-standard performances or that this will be an “easy” course. My expectations are quite high and in some cases, I may ask you to rewrite an assignment or you will have the opportunity to improve your work.

Second, I want to communicate more generally my expectations for submitted coursework (i.e., reading responses, final paper). There are notable distinctions between B work and A work (see below). Here, notice that an “A paper” goes beyond doing the assigned requirements by integrating especially thoughtful or interesting elements. While these are general distinctions, I will provide a scoring rubric in advance of paper deadlines.

A B paper has some of these qualities:
- Fulfills the terms of the assignment thoroughly
- Effectively develops ideas with examples or details
- Connections are made to psychological theory and concepts, but less consistently
- Organization is clear and logical; transitions are smooth
- Paragraphs are unified and coherent
- Opening and conclusion serve the paper as a whole
- It has few sentence structure, grammar or mechanical errors

An A paper has some of these qualities:
- Fulfills the assignment thoroughly and interestingly or creatively
- Develops ideas in a full and satisfying way, often with interesting or unusual insights
- Consistently draws connections to psychological theory and concepts
- Organization is clear, smooth, and logical; transitions seem natural.
- Paragraphs are unified, coherent and fully developed.
- Opening and conclusion are distinctive or interesting, and are carefully woven into the paper.
- It has, at most, one or two grammar, sentence structure, or mechanical errors.

Late Assignments
Assignments not turned in on time will be dropped a half a letter grade for each day they are late.

Special Arrangements
Please let me know if you need special arrangements for test taking, note taking, etc…

Academic Integrity
As specified in the University’s Academic Integrity policy, it is critical that each of us “properly acknowledge and cite all use of the ideas, results, or words of others.” This ensures that “everyone is given proper credit for his or her ideas, words, results, and other scholarly accomplishments.” This means that copying or using any portion of another student’s or researcher’s paper without directly quoting the source material is considered against the honor code. In addition, all submitted work should be your own, without the aid of unsanctioned materials or unsanctioned collaboration (e.g., cheating). If you have any questions regarding these policies (e.g. what is an acceptable degree of collaboration, how and when to use and cite secondary sources, or how to use quoted material), please consult with me and see the university’s policy on academic integrity (Quotations and resources cited from: http://academicintegrity.rutgers.edu/).
