Course Description

This course is designed to provide an overview of basic but important topics and issues in educational and psychological testing and measurement. The course topics include principles of educational and psychological measurement, such as scaling, reliability and validity analyses, item analysis, introduction to Classic Test Theory (CTT), introduction to Item Response Theory (IRT), and test development. Basic statistical knowledge is required throughout the course since some issues in the field are necessarily technical.

Course Goals

After successfully completing this class students should achieve the following goals.

Goal 1. Understand the fundamental concepts, methods, and principles of educational and psychological measurement. Specific objectives are as follows:

- 1. Understand the purpose of score transformation and be able to obtain and interpret it.
- 2. Be able to obtain and interpret reliability and validity related evidence.
- 3. Understand the general procedures of test construction and item writing.
- 4. Be able to conduct an item/test analysis from the classical test theory perspective.
- 5. Understand the general principles of the item response theory and its applications.

Goal 2. Be more measurement literate. That is, be able to read, interpret, and critically evaluate measurement methodology, reported outcomes and subsequent interpretations, as found in educational or behavioral research journals.

Course Requirements

- 1. *Exams*: There will be two in-class exams (midterm and final) and one take-home exam. They will be worth 30%, 30%, and 20% of the final grade, respectively. The exams may consist of multiple choice items, computations, and short answer/essay questions.
- 2. **Presentation:** A short presentation, worth 20% of the final grade, will be held at the end of the semester. Each student selects and presents a journal paper in which skills that we learn in class were employed. More detailed information about the presentation will be distributed.
- 3. *Homework assignments and in-class work activities* will be given throughout the semester. The answers will be either posted on the course website or discussed during class.
- 4. Reading assignments: Assigned readings must be completed prior to each lecture.
- 5. *Attendance*: Your attendances at the meetings are expected during the semester. Please bring any necessary planned absences to my attention ahead of time.
- 6. *Calculator*: A calculator that performs basic operations is necessary for homework assignments, class exercises, and exams.

Grading System

Final letter grade will be assigned as follows:

 Final Score	Letter Grade	
 90% and Above	A	
80%-89.99%	\mathbf{B} +	
75%-79.99%	В	
65%-74.99%	C+	
60%-64.99%	C	
55%-59.99%	D	
Below 55%	F	

Communication

In this course <u>e-mail</u> will be used as a means of communication with students. You will be responsible for checking your e-mail regularly for class work, deadlines, changes and announcements. Do NOT leave me a phone message in my office because I do NOT check my voicemail regularly. I do, however, check email several times each weekday.

Class handouts used by the instructor will be available on Sakai website at http://sakai.rutgers.edu under 15:291:515 S14 PsyThoeryI. They will be made available by 8AM each class day. It is your responsibility to print them out if you want to have hard copies in class. The handouts provide a skeleton of what is being covered each day and will thus be an incomplete version of the material actually covered.

<u>Tentative Class Schedule</u>
The following class schedule is subject to change if necessary. Reading assignments must be completed each week.

Policy on Academic Integrity

Please refer to the Policy on Academic Integrity for Undergraduate and Graduate Students at http://academicintegrity.rutgers.edu. Clear evidence of violation of academic integrity policy may result in a grade of F for the course.

Accessibility of Online Courses

Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation: https://ods.rutgers.edu/students/documentation-guidelines

If the documentation supports your request for reasonable accommodations, your campus's disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form on the ODS web site at: https://ods.rutgers.edu/students/registration-form
