Learning Goals:

- Understand the underlying theory and concepts of positive psychology;
- Understand and use positive psychology principles and interventions in your own life and with your clients/students; &
- Understand the role of positive relationships and enabling institutions in increasing happiness and well-being.

Course Description:

The field of psychology was born out of a desire to study the human condition, both our challenges and triumphs. However, traditional psychological research and practice has focused largely on diagnosing and treating human's limitations, with less attention paid to our strengths. Positive Counseling Theory & Practice will provide an in-depth discussion of Positive Psychology, a field that helps practitioners transition from trying to undo the worst things in life to trying to build the best things in life. In this course we will cover the theory and research of Positive Psychology, as well as how to conduct positive assessment, diagnosis, and counseling interventions. The course incorporates activities intended to engage and instruct counselors in using character strengths such as optimism, gratitude, forgiveness, generosity, and others to promote enhanced well-being and happiness in family, school, work, and community settings.

THREADED DISCUSSIONS/PARTICIPATION (20 points each week for a TOTAL of 260 points): Starting the second week, our class will hold threaded discussions on eCollege, with two questions posted per week in response to textbook material, videos watched, and/or exercises engaged in. *Questions will be geared toward how you can apply the material to your work and life.* You can consider these the online equivalent of comments and responses you might have during a classroom discussion. **You will post a 100-200 word response to each of the two weekly questions, as well as a reply to at least one classmate's response per question (totaling at least two replies of 50-100 words each).** In your responses/replies, utilize a combination of course material and real-life experience. Please note that both quantity and quality are important considerations when it comes to participation. For example, a message which says simply, "I agree," does not constitute a substantial reply because it does not add anything of substance to the discussion. You must add something of substance to the discussion—this would consist of new ideas, your perspectives, pointed follow-up questions, etc. **All responses/replies are due by midnight Thursday each week. I will post questions for the following week on Thursdays.**
