2 and 3 Communication and culture –Papers

This class is made up of a diverse group of individuals with diverse professional, academic and personal experiences. Achieving communication competence in a diverse society is necessary for success. This assignment will give you the opportunity to learn about communication and culture and get to know the individuals in your group. The purpose of these assignment is to explore and understand the ways in which culture influences the way we communicate and form relationships with others.

Assignment 1 - Identify your culture and the cultures that have impacted your development. How are some of the communication topics listed below traditionally presented in the culture(s) you identify with? To answer this question, you must engage in research that includes academic and non-academic sources.

- Language and verbal communication
- Nonverbal communication
- Gender roles
- Family communication
- The expression of emotions
- Conflict management
- Friendship communication

You will not be able to include all these topics in your paper – you may also identify different topics. You should include at least two topics, but no more than five topics. Please submit a 3 – 5 page paper.

Assignment 2 – Please share your paper with your group. Each person in the class will have their paper plus 2 or 3 of their classmates’ papers (depending upon the size of the class). With your group of papers, please compare/contrast what you have read and reflect on some commonalities and differences and how what you have learned through developing your paper and reading your classmates’ papers might shape your perspective as an educator. Please include what you have learned in other classes about adult learning theories. Please submit a 3 - 5 page paper that addresses these topics.

3. Group Project

The major project for this class requires you to work in groups to identify a scenario that will require a training/education program that takes into account culture/race/ethnicity/religion/gender and then create a culturally appropriate program to prepare your group to achieve success with the project.

For example: You as a diverse group of individuals have been assigned to work together on a project. Detail the project, individuals assigned to the project, potential issues based upon the individual bios, identify a few major training needs based upon the group, and then create the training program.

Or, maybe you are a diverse group of volunteers who need to get prepared for an international assignment. Detail the assignment, the group of volunteers, potential issues based upon the location of the assignment and your team, identify a few major training needs based upon the group and the location of the assignment, then create the training program.

Preliminarily you might identify issues that are more associated with stereotypes, but the project should evolve to move away from stereotypes and include differences that actually exist across the cultures/religions/ethnicities/races that must be understood so that work can get done. This training program does not need to include assessment; it should be about identifying the needs of your group to accomplish your task, identifying culturally appropriate content/exercises to train your group, and justifying your choices.

The assignment is broken into deliverables which you will complete over the course of the semester.

Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation: <https://ods.rutgers.edu/students/documentation-guidelines>.
