Rutgers University welcomes students with disabilities into all of the University’s educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentations: https://ods.rutgers.edu/students/documentation-guidelines. If the documentation supports your request for reasonable accommodations, your campus’s disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form on the ODS web site at: https://ods.rutgers.edu/students/registration-form.

**Course Description**

**Learning goals:**

**New Jersey Professional Standards for Teachers (2014)**

Standard Two: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards:

- (6) The teacher accesses resources, supports, and specialized assistance and services to meet particular learning differences or needs and participates in the design and implementation of the IEP, where appropriate, through curriculum planning and curricular and instructional modifications, adaptations, and specialized strategies and techniques, including the use of assistive technology.

2 http://caepnet.files.wordpress.com/2013/09/final_board_approved1.pdf
Standard Six: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in examining their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision-making.

- (9) The teacher continually seeks appropriate ways to employ technology to support assessment practice both to engage learners more fully and to assess and address learner needs.

Standard Eight: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

- (6) The teacher understands how content and skill development can be supported by media and technology and knows how to evaluate these resources for quality, accuracy, and effectiveness.

Standard Eleven: Ethical Practice. The teacher acts in accordance with legal and ethical responsibilities and uses integrity and fairness to promote the success of all students.

- (2) The teacher advocates, models, and teaches safe, legal, and ethical use of information and technology including appropriate documentation of sources and respect for others in the use of social media.

Council for the Accreditation of Education Professionals (2013):

Technology & Digital Learning
The Commission’s standards include several references to applications of new technologies to educational situations:

- Standard 1 endorses the InTASC teacher standards in their entirety, and the performances, knowledge, and dispositions that are extensions of those standards include a score of references to applications of technology. Educators must know how to use technologies and how to guide learners to apply them. They must know how to use digital and interactive technologies for efficiently and effectively achieving specific learning goals.

- Standard 1 also states that providers are to “ensure that completers model and apply technology standards as they design, implement, and assess learning experiences to engage students and improve learning and enrich professional practice.”

- Standard 2 on clinical experiences refers to technology-enhanced learning opportunities as part of clinical experiences, as well as appropriate technology-based applications for selection, development, evaluation, and continuous improvement and retention of clinical educators. Clinical partnerships are to include technology-based collaborations, as well.

- Standard 3 on candidate quality states that providers present multiple forms of evidence of candidates developing knowledge and skills during preparation, including “the integration of technology in all of these domains.”

Course catalog description:
05:300:350 Education and Computers (3) Establishes a foundation for using the computer and technology in a variety of educational settings across all subject areas. The course is hands-on in nature, with focus on current trends. Additionally, learners can expect to discuss theory, practice, and social/philosophical issues related to the use of computers in education. Some familiarity with computers is recommended; no prior computer skills are required.

Other description of course purposes, context, methods, etc.:
As an online course, students are expected to access the course daily to complete required assignments. The material covered in this course is practical and hands on. Students will explore a variety of online/web-based learning tools and work collaboratively with peers to explore how these tools can positively impact student learning and professional practice. Weekly class discussions, video reflections, and written essays will be assigned and due on specific due dates as assigned on the eCollege website.

Required texts:
No textbooks are required for this course.

Grading Policy:
Each assignment in this course will be graded out of a 4-point scale which includes:
4/4 = Outstanding
3/4 = Good
2/4 = Satisfactory
1/4 = Unsatisfactory
0/4 = Not Completed By Due Date

No work in this course will be accepted after its due date. Failure to hand in work by the due date will result in the student earning 0 points for the assignment – no exceptions.

Students will be able to access their grades at their convenience via the Gradebook feature on eCollege webpage. All assignments, with exception to the final project, will be worth 4 points. The final project will be worth 24 points.

Academic Integrity Policy:
Any violation of academic honesty is a serious offense and is therefore subject to an appropriate penalty. Refer to http://academicintegrity.rutgers.edu/integrity.shtml for a full explanation of policies.

Class Website:

Course Requirements

Attendance Policy:
This course, Education and Computers, is an asynchronous course. As such, students are not expected to be online at a certain date or time. While students do have flexibility as to when they would like to access the course, specific assignments must be completed by their assigned due date and time for credit to be given.

Summary of Requirements

Below is a list of topics and assignments that will be covered in Education & Computers. For specific assignment requirements, please visit the course page. All assignments must be completed by 11:59 PM EST on the evening of the due date. As an example, if an assignment is due on 1/2/16, you have until the night of 1/2/16, 11:59 PM EST (1 minute before it turns 1/3/16) to complete the assignment.
