Program Evaluation: An Introduction to Methods and Practice
Fall, 2018
15:291:520:90
3 Credits
Online Course at: http://onlinelearning.rutgers.edu/canvas

Instructor: Ting Wang, Ph.D.
Department of Educational Psychology
Graduate School of Education

Email: tw475@gse.rutgers.edu
Mode of Instruction: Online
Virtual Office Hours: Virtual classroom on Canvas and Email any time

Overview:
This is an introductory, graduate level course on the history, philosophy, and major approaches commonly used to systematically evaluate educational and social programs. The course topics include the basic uses and purposes behind program evaluation, taxonomy of evaluation models (or approaches), descriptions of several important evaluation approaches, and guidelines for planning, conducting, and using evaluations. In addition, you will learn about the guiding principles for professional evaluators as specified by the American Evaluation Association. You will also learn about the University's guidelines for the use of human subjects in research and evaluation studies.

Course Objectives:
At the completion of the course, students will be able to:
• develop a conceptual understanding of the objectives and methods of program evaluation.
• develop knowledge about the essential elements of a program evaluation.
• assess the adequacy of an evaluation design, or how well a program evaluation met its objectives.
• To gain modest familiarity with SPSS software and Excel spreadsheets. This involves the computation and interpretation of basic descriptive statistics and graphics.

Required Resources:

Required Textbooks

Technology and Software Requirements
You need very reliable access to the internet to successfully complete this course. Please make sure to have a reliable back-up plan in place (local library, friend’s house, coffee shop) in case your primary access is not available when you plan to work on the class. Rutgers has a plethora
of options for access on terminals (libraries, computing centers) and most buildings have wireless access for a laptop.

SPSS and Excel (required). This software is available for use in the GSE computer lab (room 208 of the GSE). We will be conducting some statistical analyses at the introductory level, but the focus of the class is not on statistics. SPSS and Excel are available at a number of University computing labs, see https://oit-nb.rutgers.edu/labs for details.

Office Hours
As this is an online course, I have set-up a discussion area on our Canvas website called “Virtual Office Hours.” Rather than email me questions regarding the course, please start a discussion thread and I will answer your questions right online so everyone can benefit from your inquiry. Of course, if your question is personal in nature (e.g., you would like explanation of a specific grade, you have a personal issue) please email me. Please make sure that Canvas has your most updated email address. I frequently use email to communicate with students and pull email addresses directly from the Canvas system each time.

1. **Syllabus agreement.** Please review the syllabus taking note of all details. Assignment: Copy our syllabus into a new word document. Read the blurb I have written at the bottom of the page. Type your name at the bottom of the last page. Save the document and submit it as an assignment in Week 1 (off top navigation bar) on our Canvas web site. I will take this as evidence that you have read and understand the syllabus (and you will also get some practice using the “Submit Assignment” if you have not done so before).

2. **Quick Bio.** It is important for instructors to know students and learn what you bring to the class from previous experiences. Assignment: In our Canvas class, under the Course Home header you will see a Discussion tab. This is set up as a threaded discussion so please post a short bio (100-200 words).

3. **IRB certification.** An important pre-requisite before conducting any evaluation study or research project is to participate in education regarding the regulation, policies, and ethical standards governing the protection of human subjects. You are required to complete the
Human Subjects Certification Program offered online by the Office of Research and Regulatory Affairs. This is available at https://orra.rutgers.edu/citi. Take the online course, and submit a copy of the letter as an assignment to in Week 2 by Friday, September 14.

4. **Class discussions.** As with any graduate level course, discussions are a critical part of your learning experience. You are expected to be an active participant in all discussion threads by bringing issues, questions, concerns, and experiences to all online discussions. Discussions will prompt you to first read some specified material and then ask you to post a single response to a question. Your goal is to demonstrate that you have read and pondered the material. Only use professional language in your discussion posts. For each discussion please contribute at least one original post and answer any follow-ups your original post receives (from me or your classmates). You should spend some time reading and commenting on the posts of your classmates. At the end of each discussion I highly recommend you revisit and read all submissions as the ideas will be of great help to you. You will notice that many of our discussions are directly related to your final paper and the ideas of your classmates will be invaluable as you complete that project. Please be respectful and professional when responding to others.

**Important tip** I highly recommend composing your posts in a word processing program first, then cutting and pasting on the discussion thread in Canvas. Writing directly to Canvas presents the risk of a technology failure or lock-up.

Each discussion has a deadline for your original post, and this original post is due Wednesday at noon. All substantive comments (by me or your peers) to your original post need to be addressed by Friday at 11:59PM. Late entries are not accepted. After the deadline each discussion should be in a “read only” state so you can review. Each discussion will be graded on a scale of 0-100. Full credit is given for original responses which demonstrate that you have read, studied and pondered the information and topic/question. I search for evidence that you have digested the applicable information. Initial posts should be no more than 150 words and all deadlines must be met. Your classmates and I may pose a question/comment under your original which must be addressed by Friday at 11:59PM.

5. **Homework.** Three homework assignments will be assigned; one at week 4, another at week 8, and one more at week 11. Each assignment will be graded on a scale of 0-100. Late homework submissions are not accepted.

6. **Final evaluation project.** Identify or chose a program/project you are familiar with and write an evaluation proposal to evaluate it. The proposal will need to include all the major components in an evaluation design. The minimum length of the proposal is 1500 words. Your final project will be graded on a scale of 0-100. You are not required to actually collect the evaluative data/information for this evaluation assignment, but you will earn 20 bonus points if you are able to collect and submit the raw data with this assignment (raw data contain individual participant’s scores, interview responses, etc.); you will earn another additional 20 points if you are able to analyze the data using appropriate statistical software for quantitative, and analyze qualitative data following a sound qualitative data analysis
procedure, and include the analysis results and evaluation findings in the proposal. Late final project submission is not accepted.

**Weekly Schedule**

Each week starts at 12am Monday.

The following will be required each week:

1. Text / article reading and discussion question
2. Homework if assigned
3. Program Evaluation Standards reading, lecture, and discussion

By Wednesday at noon, you must respond to each discussion question (original post due time). Thursday – Friday is time for you to actively participate in discussions responding to classmates and any follow-up questions that may be posted. Final replies to your discussions are due on Friday at 11:59PM.

Homework will be assigned at the week of 4, 8 and 11, you must submit homework by Friday 11:59PM.

**Submitting Assignments**

Please make sure to only submit assignments in the drop box on our Canvas website. If you submit an assignment in any other manner (another location on our site, via email) it will not be graded. We need a running record of submissions as well as progress.

Submitting assignments at the last minute never goes particularly well.

Should you submit an assignment after the due date, your grade will drop by 25% for each day late. Prior approval for a late assignment to receive full credit needs an acceptable reason: illness.
(with note from physician), family emergency, or religious holiday. In these cases, arrangements should be made with me as soon as possible for alternative due date. I realize that certain unexpected life situations are stressful, so the sooner I am informed of an unusual circumstance the greater my chances are of helping you navigate the course.

Please follow all directions for both completing and submitting assignments. Send only required information.

Course final grade criteria:
A: 90-100
B+: 80-89
B: 70-79
C+: 60-69
C: 50-59
F: Less than 50

All assignments are graded out of 100 and then final grades are computed on Canvas using the weights listed above.

**Additional Tips for the Course:**

1. What you get out of this course (knowledge and your grade) depends on what you put into it. My best advice to you is to go in seeking knowledge and a good grade will follow.

2. I understand how hard it is to juggle many of life’s demands of graduate school and the time you will need to put into our course to be successful. In my experience, students who put in about 15 total hours of work per week (reading, preparing, actively participating in online discussions and completing homework assignments) are the most successful. I make it as easy as possible as all work can be completed on your own time and there are no mandatory check-in times. However, there are deadlines for assignments and discussions.

3. We need to assume that we are all very busy. I understand and can relate to those of you who work (full-time or part-time), have children, are taking other classes, caring for family members (and juggle other things) and have developed the course with that in mind. If your schedule is packed, I suggest developing a master plan of your time.

4. If you find yourself dealing with an unexpected personal situation, please let me know so we can work out a plan for you to complete the class. Please do not disappear for a length of time. And please do not push it with excuses, “I had too many parties to attend this weekend” or “you have no idea what it is like to be a busy student” will not go well.

5. Please do not wait until the last minute to ask questions if you are confused, find contradictory information, or if you think something is missing. Additionally, do not wait until the last minute to get work completed.

6. You need very reliable access to the internet to successfully complete this course. Please make sure to have a reliable back-up plan in place (local library, friend’s house, coffee shop)
in case your primary access is not available when you plan to work on the class. Rutgers has a plethora of options for access on terminals (libraries, computing centers) and most buildings have wireless access for a laptop.

7. Please understand that I am not qualified in any way to help you resolve any technical difficulties you may experience with Canvas. It is always best for you to contact the Canvas hotline for assistance (most problems usually occur when students attempt to submit assignments and posts at the last minute).

Students with Special Needs

If you have special needs as addressed by the Americans with Disabilities Act and require academic accommodations or modifications, please notify me immediately. I will make every effort will be made to support your work and success in this class.

Here is the official University policy:

Rutgers University welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact the appropriate disability services office at the campus where you are officially enrolled, participate in an intake interview, and provide documentation: https://ods.rutgers.edu/students/documentation-guidelines.

If the documentation supports your request for reasonable accommodations, your campus's disability services office will provide you with a Letter of Accommodations. Please share this letter with your instructors and discuss the accommodations with them as early in your courses as possible. To begin this process, please complete the Registration form on the ODS web site at: https://ods.rutgers.edu/students/registration-form.

Policy on Academic Integrity

Please refer to the Policy on Academic Integrity for Undergraduate and Graduate Students at https://slwordpress.rutgers.edu/academicintegrity/wp-content/uploads/sites/41/2014/11/Al_Policy_2013.pdf. I will follow this policy without exception. It is your responsibility to be familiar with the terms of this policy. As graduate students you are held to a higher standard than undergraduates. Any unauthorized help on assignments or examinations is a serious violation of academic integrity. I expect that you have read and will comply with the university’s standards on academic integrity. Appropriate action will be taken should you be caught submitting dishonest work. All assignments are to be completed on your own unless specified as a group activity. All references to another’s work must be properly cited.

I have read and understand all requirements of the course. I understand it is my responsibility to find reliable internet access and to manage my schedule to accommodate all deadlines.
